

BURL the Squirrel and the I-90 Project

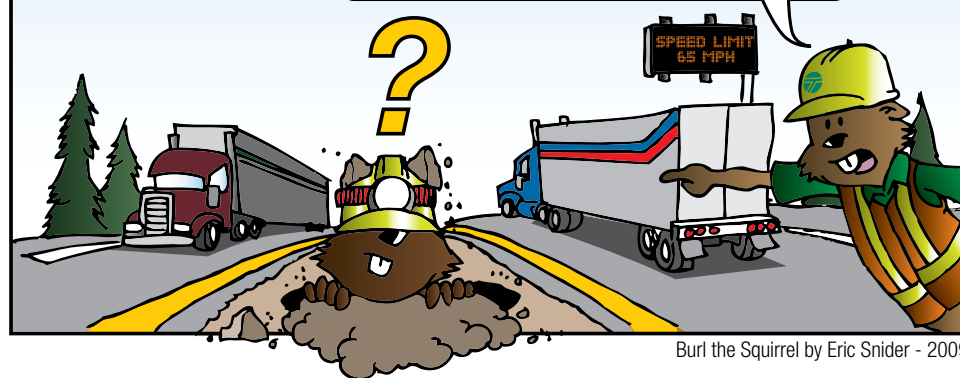

Attention all Snoqualmie Pass wildlife!!!
We need to keep looking for safer ways to
cross Interstate 90, because dodging cars
just isn't working out!

My buddy the little Mole is going to try digging under
the highway for now...

NO! NO! NO!
You need to dig **ALL** the way
across the road!

Burl the Squirrel by Eric Snider - 2009

I-90 Snoqualmie Pass East Project

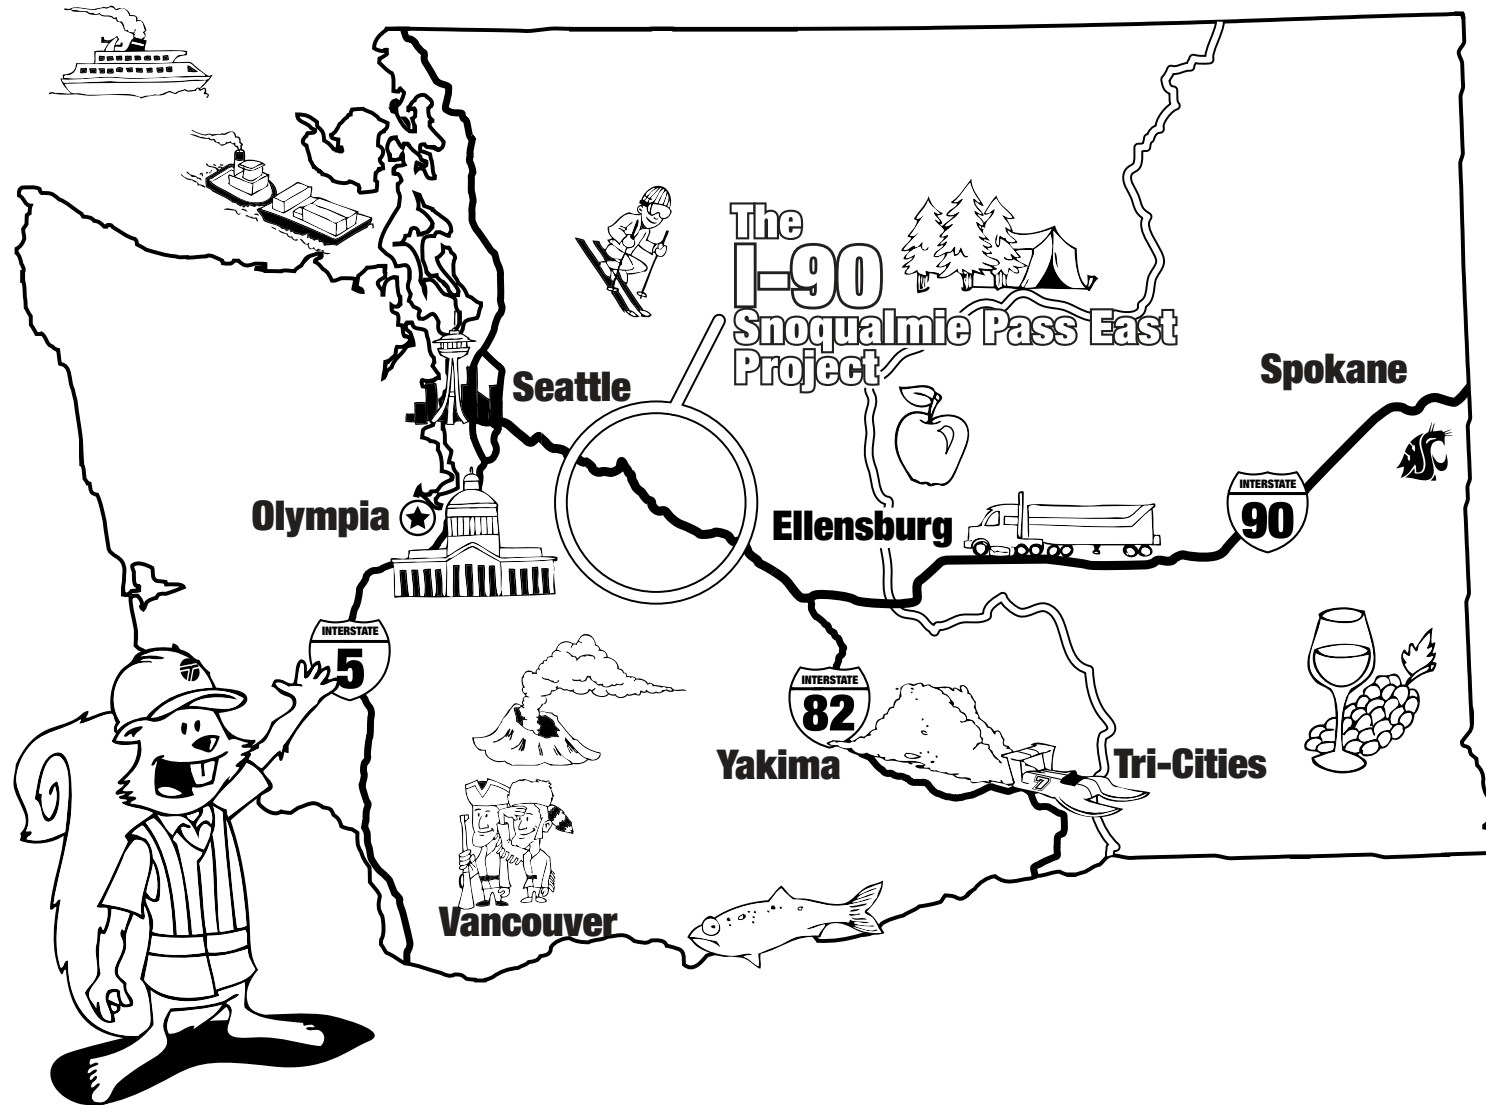

BURL The Squirrel Activity Book

I-90 Snoqualmie Pass East

CONSTRUCTION BEGINS SPRING 2009

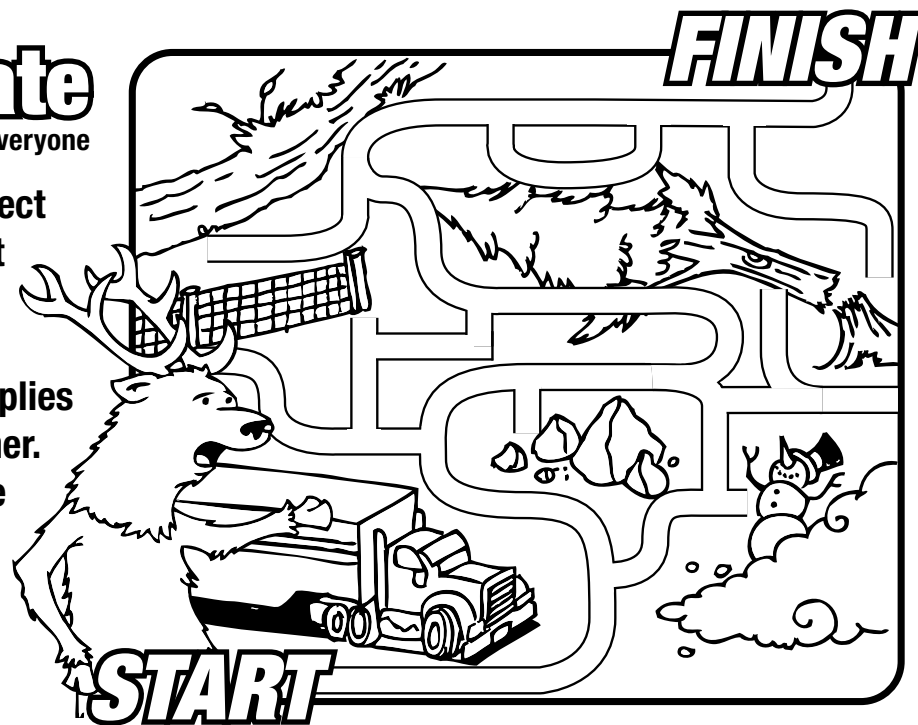

Where is the Project located?

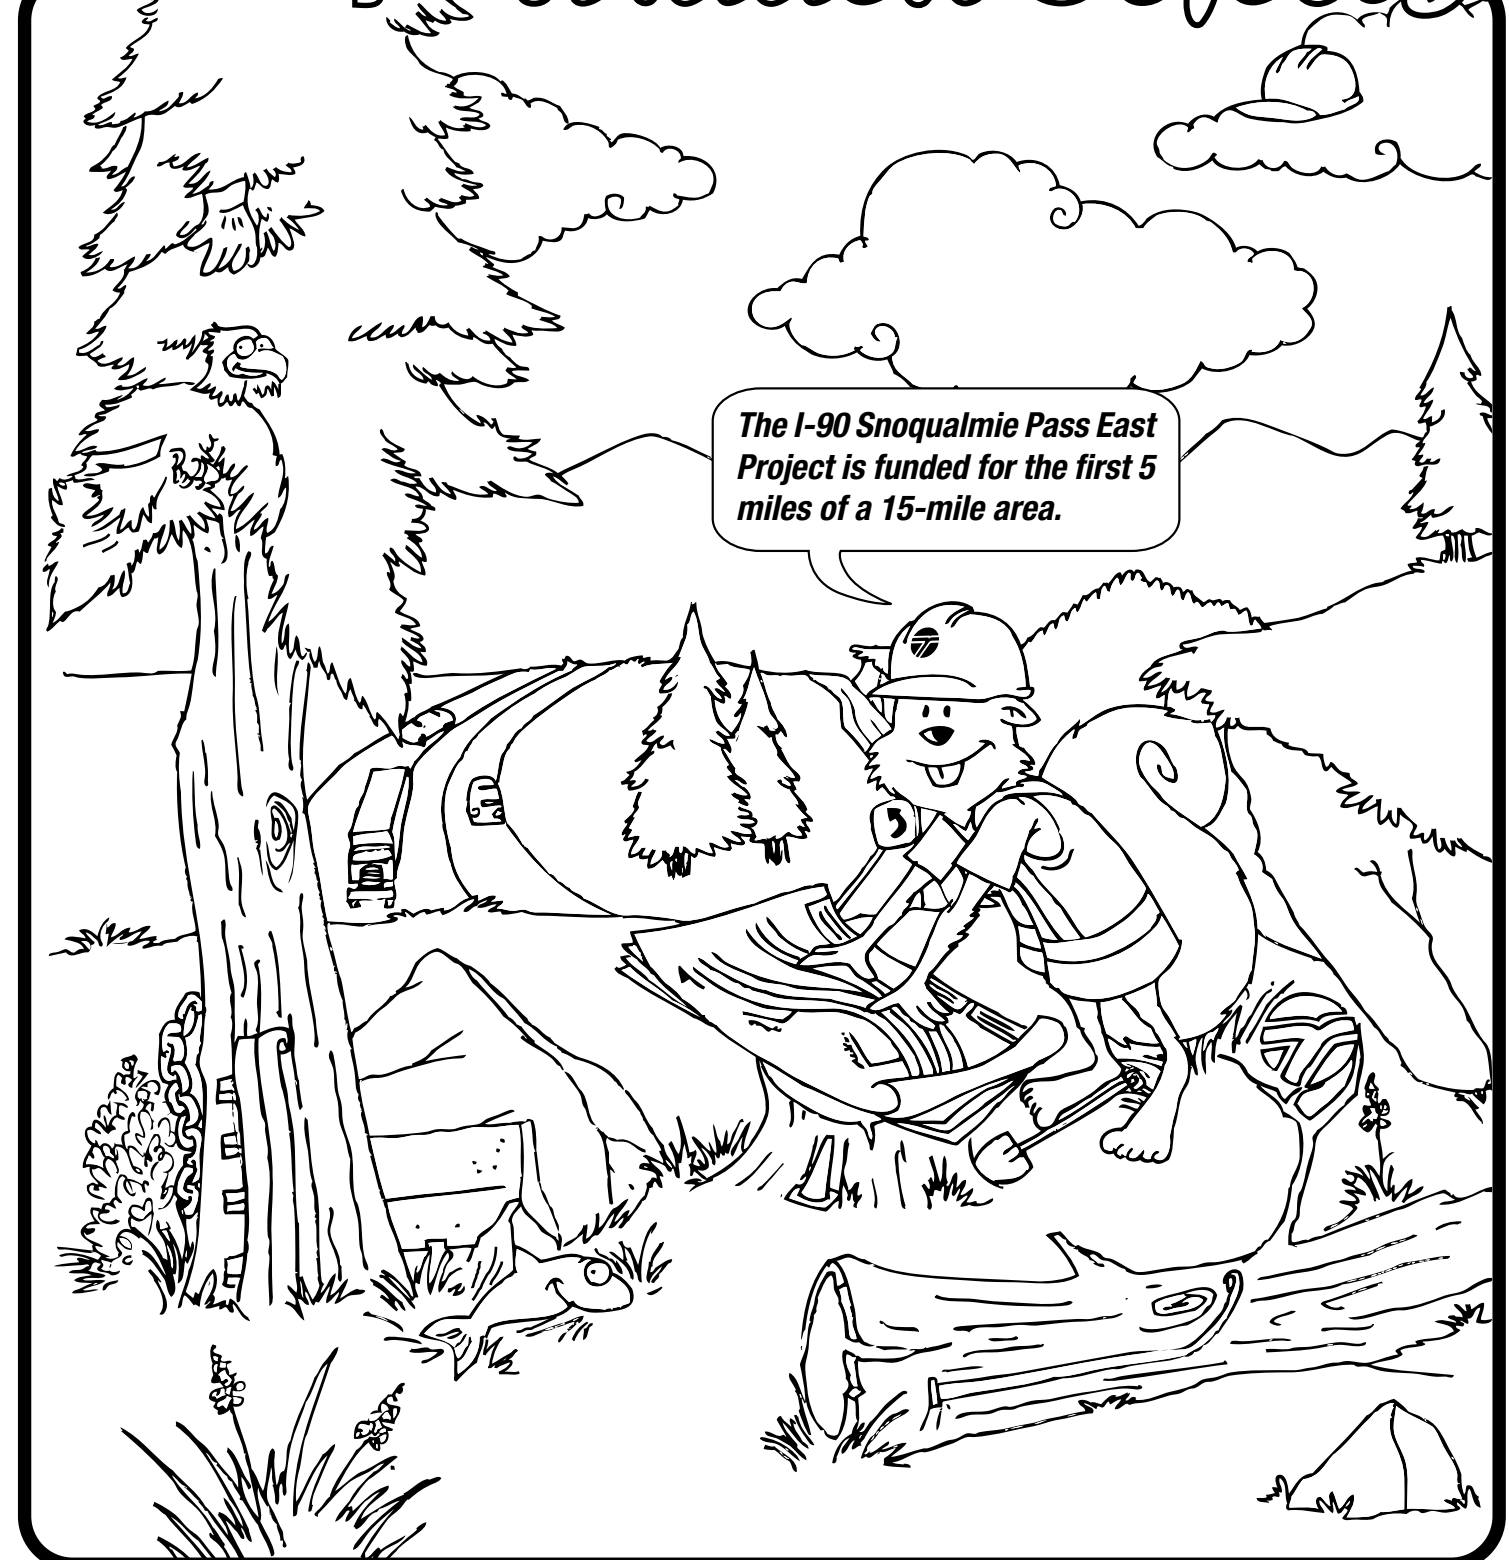

Washington State

has something for everyone

The I-90 Snoqualmie Pass East Project is located in the mountain pass that connects eastern Washington with western Washington. I-90 makes it possible to move groceries and supplies from one side of the state to the other. Wildlife have many obstacles on the path to their habitat besides traffic. Help the elk find a safe path to the finish line.

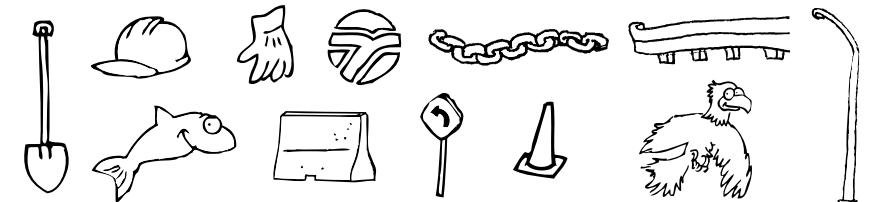

I-90 Project *Hidden Objects*

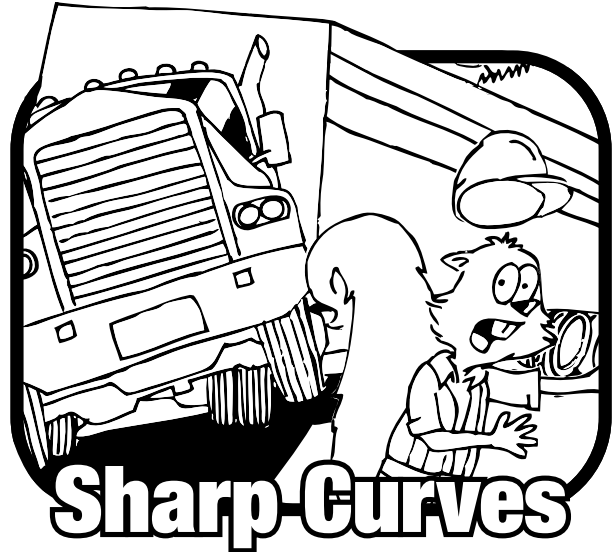

Find these objects

Shovel, hard hat, work glove, chain, guard rail, Flying "T" (WSDOT logo), Bull Trout, road barrier, curve sign, road cone, Bald Eagle & lamp post.

6 Problems with the Highway

WSDOT will increase safety for people and wildlife on I-90 by straightening sharp curves, replacing 40 year old pavement, building wildlife crossings over and under the highway, fixing rock slopes, and reducing avalanche delays. WSDOT will reduce traffic jams by adding an extra lane in each direction. Construction will begin in spring 2009.

Sharp Curves

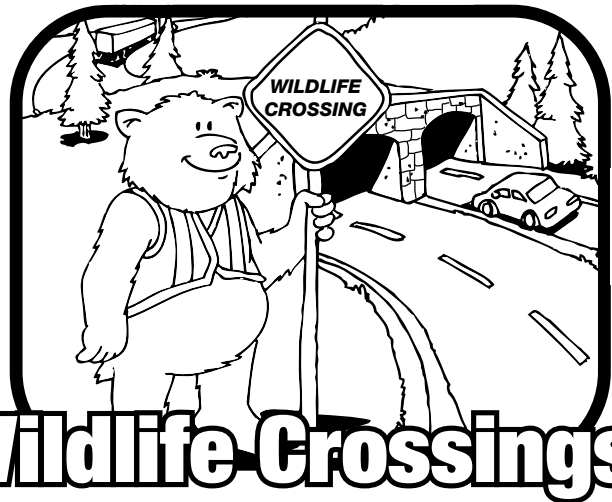

Rockfall

Cracked Pavement

Avalanche

Wildlife Crossings

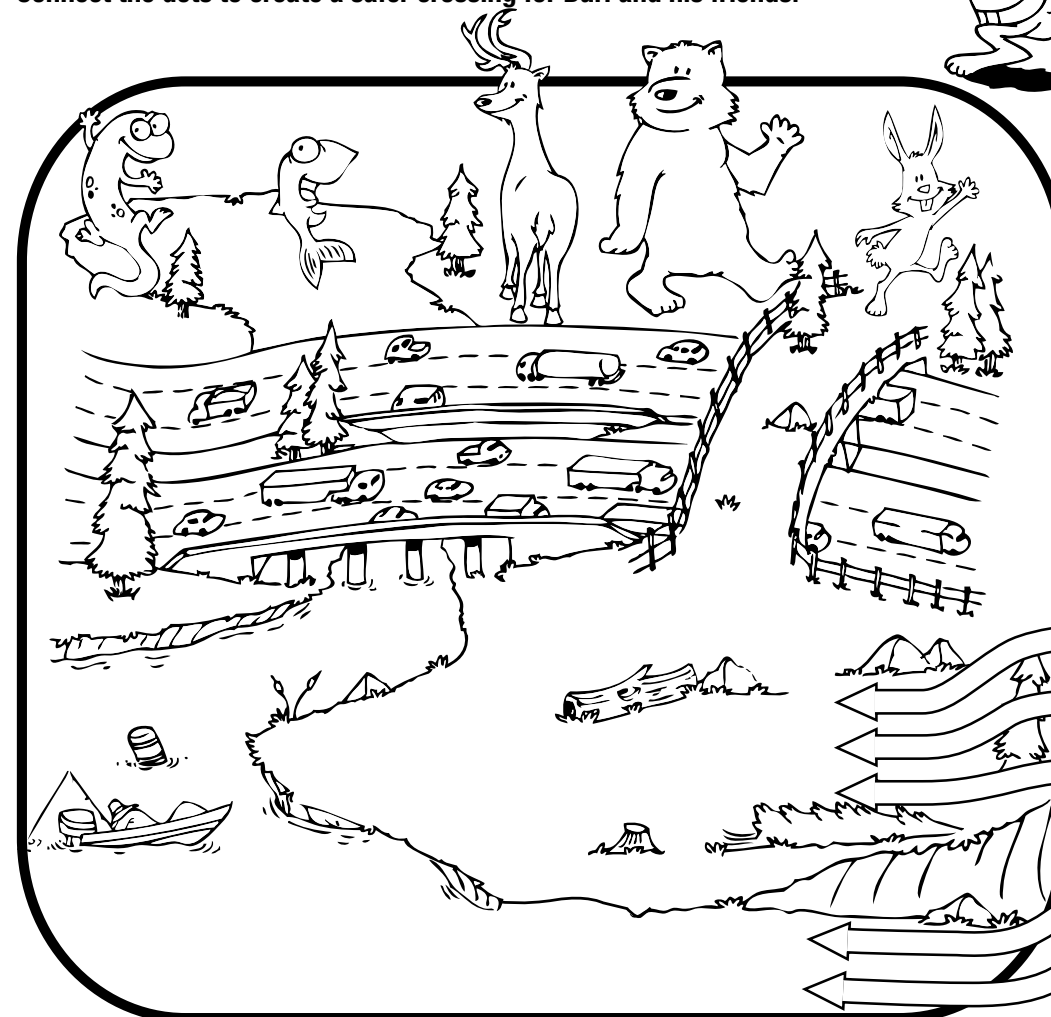

Traffic Jams

BWRL and his wildlife friends

WSDOT has plans to build wildlife crossings over and under the highway. Connect the dots to create a safer crossing for Burl and his friends.

Cross
over & under
the highway

Help the wildlife safely cross I-90. Match the names to the animal by drawing a line across the highway. Remember to watch out for obstacles and choose the best crossing, over or under the highway.

Rabbit
Bear
Deer
Bull trout
Salamander

BURL the Squirrel's Highway in Need

Fun Fact: I-90 Snoqualmie Pass got 50 feet of snow during the winter of 2007 and 2008. That's enough snow to fill three baseball stadiums...Now that's a SNOW delay.

Avalanche

WSDOT will build a new snowshed that will cover all 6 lanes of the highway.

Find: Avalanche, rockfall, cracked pavement, sharp curves, wildlife crossing, snowshed, traffic jams, highway, Snoqualmie Pass East, Interstate, & construction

Fish & Water Passage

Bridges will be expanded to allow fish and wildlife to cross under the highway.

Keechelus Lake

Wetland Restoration

Rockfall

WSDOT will add a lane in each direction to reduce traffic jams.

Wildlife Crossings

Cracked Pavement

Sharp Curves

Traffic Jams
